

HURCO Vac250™

Affordable Vacuum Excavation

HURCO's VAC250 is the perfect tool for vacuum excavation and makes quick work of your maintenance, repair and excavation needs.

- Potholing for buried utilities
- Clean small catch basins
- Make post holes for signs
- Clean water main valve boxes
- Excavate and replace valve boxes
- General vacuum cleanup
- Much more

Partner the VAC250 with HURCO's world famous Spin Doctor valve and hydrant exerciser and you have the most affordable, full maintenance machine to take care of your water main valves and hydrants.

The VAC250 is a low maintenance machine with the industry's best warranty.

Performance Counts

- Powerful engine options – CAT Diesel 36hp and Kohler Gas 34hp
- Faster hydro excavation with a Gardner Denver 14hg vacuum pump and a 4.7 gpm @ 3000 psi Giant high pressure water pump.
- Micro Tube filter system that will handle dust as fine as grain dust. Washable and reusable.
- Balanced load full or empty

- Pitched angle tank for fast unloading and less maintenance
- Heavy duty trailer with electric brakes.
- Optional hydraulic circuit.
